PRE-COOLED BULBS

Order early. Only advance orders can be filled because of the fact that the bulbs have to be placed in cold storage early. The advantage of pre-cooled bulbs is that they enable the grower to force the bulbs into bloom at a much earlier date.

The Mendel Tulips can be brought into the greenhouse about December 15. They should be placed under the bench until they are 6 inches high, at which time they can be transferred to the top of the bench for flowering. The Darwin Tulips can be brought in January 1, using the same treatment as for Mendel Tulips. Pre-cooled Tulips and Daffodils will be ready for delivery October 1.
